

Web Producer

Ledger Bennett England, United Kingdom (Remote)

You will focus on the development of web and landing pages within a CMS with a continuous drive for improvement on performance and quality. The day-to-day will focus on the delivery of web pages for global, multinational technology companies balancing technical requirements with compelling creativity and messaging.

As our Web Developer, you'll be trusted to:

- Create, update, and maintain content in Content Management System (Adobe CQ5/AEM).
- Support in-production and maintain accurate reports and logs of page production and versioning, including upcoming and historic changes.
- Managing the priorities, coordination, and communication with Client
- Working with the PM and stakeholders to manage the campaign, product, and resource roll-out, and coordinate with supporting marketing activities and Regional Marketers for smooth execution.
- Tracking content through planning and development, monitoring its status and implementation according to a delivery plan.
- Monitor and quality control Global content for the site from multiple regions and troubleshoot or escalate as required.
- Facilitate structuring and documentation of web requirements.
- Have an overview of the approach to the web and what the 'go-to markets' standards entail.
- Determine, manage and oversee the localization process and flow of global pages to regional sites.
- Provide input into SEO, UX, User Journey, Taxonomy, and Site Architecture.
- Support the production of digital graphics using Photoshop, including uploading to the Digital Asset Management System.
- Ensure that marketing materials comply with all Corporate brand and style guidelines.

You're an excellent fit for this role if you have:

- An inquisitive mind and positive attitude, bringing structure and best-in-class performance to a growing team.
- Experience working within an international, multi-lingual, multi-domain web estate

- Evidence working with a wide range of stakeholders and communicating effectively on website project delivery - creating, updating, and owning process where needed and to tight timelines
- Experience in managing multi-language websites and translation workflows
- A track record in gathering business requirements, implementation planning, and appropriate level of documentation
- Highly desirable; experience in UX, User Journey, Taxonomy management. Site Architecture, salesforce, proven results in on-page and understanding technical SEO
- Desirable: Experience within web analytics platforms such as Adobe SiteCatalyst, Omniture, WebTrends, Google Analytics, AdSense (or similar) and technical knowledge of web development languages (such as HTML, CSS)
- Desirable: working knowledge of data segmentation and how this drives dynamic web content
